2. When working at height, what safety precautions should be adopted besides wearing a safety helmet?
  - a. Safety goggles
  - b. Cotton gloves
  - c. Safety belts
  - d. Hiking shoes
  
3. Which of the following types of fire extinguishers is not suitable for use in fires caused by electrical failure?
  - a. Bromochlorodifluoromethane extinguisher
  - b. Powder extinguisher
  - c. Foam extinguisher
  - d. Carbon dioxide extinguisher
  
4. Understanding plans refers to:
  - a. Carry out the work casually
  - b. Carry out the work according to the model.
  - c. Carry out the work according to your personal preference
  - d. Carry out the work according to the building plan, model and specifications
  
5. Which of the following must be done while at work?
  - a. Taking safety measures
  - b. Not carrying any identity card along
  - c. Not wearing any protective clothing
  - d. Scattering the tools and materials around

6. What measures should be taken before laying ventilation pipe and butiminous felt?
  - a. Divide the felt in cross shape
  - b. Divide the felt in "米" shapes
  - c. Divide the felt in squares
  - d. Divide the felt in "H" shapes
7. What preparation work must be done before construction work?
  - a. Wash hands
  - b. Clean the construction site
  - c. Check the working face
  - d. Wear protective equipment
8. Which of the following is the correct procedure of laying butiminous felt around thrust block?
  - a. The installation must be completed all at once
  - b. No need to reserve any space for overlapping to avoid wastage
  - c. Complete the installation by three times separately
  - d. Ensure that there is sufficient space for overlapping and joints
9. What should be the proper procedure of laying butiminous felt on the ground?
  - a. The felt should be applied in the direction of the floor drain
  - b. The installation must begin from the centre of the platform
  - c. The discrepancy of the overlapping joint should be at least 20 mm
  - d. The joints should not be aligned
10. How should the floor drain be handled properly?
  - a. The sealing should be loose
  - b. Only tapping with hands is needed
  - c. No overlapping is required for the base and surface butiminous felt
  - d. Secure all joints using a hand hammer

11. How should the overlaps of each butiminous layer of ventilation pipe be handled properly?
  - a.Rolling, hammering and sealing
  - b.With masonry trowel
  - c.With paint brush
  - d.With hands
  
12. What would happen if the butiminous felt could not fully cover the thrust block?
  - a.There will be finishing
  - b.The stability of the joint would be affected
  - c.Poor appearance
  - d.Loose sealing
  
13. What is the effect of accurately cutting butiminous felt?
  - a.Produce more wastage
  - b.No wasted felts
  - c.No finishing or sealing is required
  - d.The finishing and sealing will be loose
  
14. In case of naked fire, what must be set in place?
  - a.Close the windows
  - b.Turn off the water tap
  - c.Fire extinguishers
  - d.Covering materials and power supply equipment
  
15. Which of the following tools must be approved by the Labour Department?
  - a.Schmidt hammer
  - b.Concrete drill
  - c.Concrete drill bit
  - d.Nail gun

16. A person should be serious at work and should uphold work ethics, including:
- a. Appropriation of other's property
  - b. Accepting money and other advantages
  - c. Craving for personal interest and neglecting the damages dealt to others
