Young Construction Talents**  
**CIC BIM Competition 2024 Successfully Concluded**

**Hong Kong • 12 June 2024** – The "CIC BIM Competition 2024" organised by the Construction Industry Council (CIC) has successfully concluded, with the award ceremony took place on 8 June 2024.

For the sixth year, the competition continued to promote the practical applications of Building Information Modelling (BIM) to full-time higher education (post-secondary) students and part-time students pursuing top-up degrees. Teams must be formed with a minimum of 3 and a maximum of 6 members from at least 2 construction disciplines. This year, participants were tasked with creatively designing the CIC Innovation Academy while demonstrating innovative abilities in applying BIM technologies.

Prof. Jack CHENG, Chairperson of the Committee on BIM and Construction Digitalisation (CD) of the CIC said at the Ceremony, "The competition emphasises the design process and design proposals, allowing participants to familiarise themselves with BIM through collaboration and competitive learning. In the second round of presentations, participants need to present the distinctive features of their team's work to the judges. During the preparation process, participants needed to fully comprehend how BIM technologies assisted their teams in completing the projects, thereby recognising the importance of these technologies in the construction industry and laying a solid foundation for their future professional development."

The competition comprised two rounds. Participating teams were required to submit conceptual proposals based on project design requirements in the first round. A panel of BIM experts then selected 12 teams from among the submissions to advance to the second round. Shortlisted teams had 12 hours to modify their first-round works according to newly announced requirements on the day and present their final works to the judging panel the following day.

Ultimately, the Polyers team, comprising students from The Hong Kong Polytechnic University, emerged as the champion. Their work exhibited a distinctive aesthetic sense and the highest level of integrity, comprehensively applying BIM while exuding confidence and team spirit during presentation. The team was also recognised by the judging panel as one of the best presentation teams.

### **About the Construction Industry Council**

The Construction Industry Council (CIC) was formed in 2007 under the Construction Industry Council Ordinance (Cap. 587). The CIC consists of a chairman and 24 members representing various sectors of the industry including employers, professionals, academics, contractors, workers, independent persons and Government officials.

The main functions of the CIC are to forge consensus on long-term strategic issues, convey the industry's needs and aspirations to the Government, provide professional training and registration services, and serve as a communication channel between the Government and the construction industry.

Please visit [www.cic.hk](http://www.cic.hk) for further details.
